CLZ6 CRUDE OIL MARKET UPDATE

CONDITIONAL SCENARIO

Bearish correction below the 90.21 rejection level

STRUCTURE

Crude oil futures rejected 90.21 after a corrective advance and remain vulnerable while below the 90.21-90.82 resistance area.

BEARISH TRIGGER

Remain below 90.21-90.82 and resume below 87.81. Confirmation supports the next downside sequence.

OBJECTIVES

The initial objectives are 85.59 and 84.69, followed by 83.10 and 80.59. A deeper extension would expose 77.90-76.90.

INVALIDATION

The bearish sequence weakens above 90.21 and is invalidated by sustained acceptance above 90.82, reopening 91.51-92.54.
