HGZ6 COPPER MARKET UPDATE

CONDITIONAL SCENARIO

Corrective decline approaching a major support decision

STRUCTURE

Copper futures are correcting from the 6.9285 high toward the 5.8887-5.75 support zone. This is a location for stabilization, not automatic confirmation.

CONFIRMATION

Hold 5.8887-5.75 and reclaim 6.0873, followed by 6.2858. Acceptance above both levels would strengthen a recovery sequence.

OBJECTIVES

A confirmed recovery supports 6.5314, 6.6829 and 6.9285. The objectives remain conditional on support holding and resistance being reclaimed.

INVALIDATION

The rebound weakens below 5.75 and is invalidated below 5.6061. Acceptance beneath that level exposes 5.4361 and 5.2460.
