SPX500 MARKET FOLLOW-UP

13 NOVEMBER 2026 / 30-MINUTE / CONDITIONAL SCENARIO

THESIS

Conditional recovery from the 7,498 support reaction

STRUCTURE

SPX500 is attempting to recover from the 7,498-7,456 support area after completing an intraday correction. The reaction is constructive, but confirmation is pending.

CONFIRMATION

Hold 7,498-7,456 and reclaim the 7,575 confirmation pivot, followed by 7,621. Acceptance above both levels strengthens the recovery.

OBJECTIVES

A confirmed recovery supports 7,708, 7,765 and 7,804. These are conditional objectives and depend on sustained acceptance above resistance.

INVALIDATION

The setup weakens below 7,456 and is invalidated below 7,426. Acceptance beneath that level reopens 7,350 and the 7,300 support reference.
