USDMXN MARKET UPDATE

13 NOVEMBER 2026 / 8-HOUR / CONDITIONAL SCENARIO

THESIS

Corrective decline toward a major support decision

STRUCTURE

USDMXN is correcting from the 18.85 resistance region and remains vulnerable while below the 18.66-18.79 resistance sequence.

SUPPORT DECISION

The primary reaction area is 18.167-18.083. Stabilization there is required before the chart can support a durable recovery scenario.

RECOVERY TRIGGER

Hold support and reclaim 18.28, followed by 18.45. Confirmation supports 18.55, 18.64 and 18.79.

INVALIDATION

The rebound weakens below 18.083 and is invalidated below 17.963. Acceptance beneath that level exposes 17.85 and deeper supports.
